- At 1655 RN called tele tech and asked to please notify RN if HR >110 due to pt being a bariatric surgical pt. At 1730, RN noticed that pt's HR jumping between 110-125. RN notified Dr. Lundgren. Pt transferred emergently to CT scan and then to preop and had to be taken back to OR due to 1730-1900, If RN would not have been watching tele monitor at time of incident, pt could've suffered greatly because of this ineffective communication.
